

2023 TURNING TOOLS

About GESAC

Xiamen Golden Egret Special Alloy Co., Ltd. (GESAC), founded in 1989, is a Sino-foreign joint venture with national high-tech, affiliated with XTC, which is one of six major rare earth groups in China. GESAC is committed to research & development, production and professional solutions providing of high-quality tungsten powder materials, cemented carbide, precision cutting tools and other tungsten products. Up to now, GESAC has become world-famous manufacturer and supplier of tungsten powder, cemented carbide and precision cutting tools products.

With the Integrated Product Development of complete tungsten industry chain, as well as a pragmatic and innovative management concept, GESAC has always maintained a strong momentum of development, providing the cost effective tungsten powder products and services for global users, offering the excellent products and perfect solutions for solving high hardness, high temperature resistance and wear resistance topics. Our brand "Golden Egret" has become one of the leading brand in the market, enjoying famous reputation in more than 40 countries and regions.

GESAC owns four production headquarters and one national level research center domestically, and three sales branches and one production base overseas. We undertook and completed several development programs independently, including the "National Science and Technology Support Programs", the "National Torch Program Projects", and the "National Key Projects" and so on. GESAC was awarded as "Key Enterprise for Strategic Emerging Industry", "Innovative Enterprise" and "Enterprise with Advanced Technology".

Product Chain

GESAC has a complete tungsten product chain from tungsten ore to tungsten powder, cemented carbide products and cutting tools.

Turning Grades

CVD Coated Carbide

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
P	GPT6110	Champagne		<ul style="list-style-type: none"> •Brand new CVD coating with special post-treatment technology and high hot hardness cemented carbide substrate, provides the grade with superior adhesion resistance and excellent wear resistance. •Recommended for Continuous conditions of carbon steels and alloy steels at high speeds.
	GPT6120	Champagne		<ul style="list-style-type: none"> •Brand new CVD coating with unique low-stress post-treatment, matching cemented carbide substrate with perfect thermo-plastic deformation resistance, guarantees the high wear resistance and toughness. •Recommended for carbon steels and alloy steels in wide cutting conditions at medium to high speeds.
	GPT6130	Champagne		<ul style="list-style-type: none"> •New cemented carbide with special cobalt enrichment controlling technology, combined with new CVD coating and advanced post-treatment, greatly improves the edge breakage. •Recommended for most Intermittent conditions of carbon steels and alloy steels at medium speeds.
	GP1105	Ash black		<ul style="list-style-type: none"> •Combining the ultrafine Al2O3 and MT-TiCN coatings with gradient cemented carbide substrate, provides the new grade with excellent wear resistance. •Recommended for stable finishing turning of carbon steels & alloy steels, including steels parting and grooving processing.
	GP1115	Yellow		<ul style="list-style-type: none"> •Ultrafine MT-TiCN and Al2O3 coatings, matching smooth indexed TiN layer and good wear resistant substrate, ensures the grade with long service life. •Recommended for stable finishing to semi-finishing of carbon steels and alloy steels.
	GP1120	Golden		<ul style="list-style-type: none"> •Ultrafine MT-TiCN and Al2O3 coatings, matching smooth indexed TiN layer and good wear resistant substrate, ensures the grade with long service life. •Recommended for stable finishing to semi-finishing of carbon steels and alloy steels.
	GP1225	Yellow		<ul style="list-style-type: none"> •Combined columnar grain MT-TiCN, Al2O3 and TiN coating with a gradient substrate provides excellent wear resistance and toughness. •Recommended for semi-finishing to medium roughing of steels and alloy steels.
	GP1130	Golden		<ul style="list-style-type: none"> •Fine MT-TiCN and tough Al2O3 in combination with high toughness gradient substrate ensures the good resistance to cutting edge breakage. •Recommended for roughing of carbon steels and alloy steels at low and medium cutting speeds.
	GP1135	Yellow		<ul style="list-style-type: none"> •Well controlled MT-TiCN, Al2O3 and TiN coating with well wear resistance combined with a gradient carbide substrate improves the edge security and high toughness. •Recommended for roughing of carbon steels and alloy steels at high metal removal rates.

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
M	GM1115	Shiny golden		<ul style="list-style-type: none"> • Combined nano-columnar MT-TiCN, thin Al₂O₃, bright TiN and a gradient substrate gives excellent wear resistance, low-stress post-treatment provides less built-up-edge and longer tool life. • Recommended for finishing to semi-finishing of stainless steels.
	GM1125	Shiny golden		<ul style="list-style-type: none"> • The combination of a tough carbide alloy matrix and TiCN/TiN coating provides excellent wear resistance. Special surface treatment technology that effectively reduces cutting resistance and suppresses chip buildup, tool life can be extended, making it suitable for semi-finishing stainless steel.
	GM1230	Shiny golden		<ul style="list-style-type: none"> • Thinner Al₂O₃ layer and nano-columnar MT-TiCN layer with a gradient substrate. Post-treatment to reduce cutting force and less built-up edge, which in order to enhance the stability. • Recommended for continuous and lightly interrupt processing in stainless steel.
K	GK1115	Ash black		<ul style="list-style-type: none"> • High wear resistant substrate with fine grain, combined with thick Al₂O₃ coating and smoothy post-treatment, provides the grade with outstanding wear resistance and high edge toughness on processing grey cast irons. • Recommended for finishing machining of grey cast irons.
	GK1120	Ash black		<ul style="list-style-type: none"> • Thicker Al₂O₃ coating combined with fine grained substrate provides high edge security and toughness. • Recommended for finishing to semi-finishing of nodular cast irons.
	GK1125	Ash black		<ul style="list-style-type: none"> • Thick MT-TiCN coating and ultrafine Al₂O₃, matching high wear resistant cemented carbide substrate with fine grain, helps to improve toughness and great wear resistance. • Recommended for interrupted roughing of nodular cast irons.

PVD Coated Carbide

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
M	GM3215	Purplish grey		<ul style="list-style-type: none"> •Brand new PVD TiAlN coating combined with submicron grained WC-Co cemented carbide substrate, provides the new grade with excellent wear resistance and heat resistance. •Recommended for finishing of stainless steels and heat resistant alloys in stable cutting conditions at medium speeds.
	GM3220	shiny orange		<ul style="list-style-type: none"> •New nano-structured PVD coating matching high cobalt cemented carbide substrate, gives the grade with excellent wear resistance and high hot hardness. •Recommended for Continuous and light or medium Intermittent of stainless steels and soft steels at medium to low cutting speeds.
	GM3225	Purplish grey		<ul style="list-style-type: none"> •The combination of optimized TiAlN coating and submicron grained carbide substrate with high Co content, provides superior adhesion and toughness. •Recommended for semi-finishing of stainless steels and threading of steels, stainless steels, etc.
S	GST7120	Purplish grey		<ul style="list-style-type: none"> • New higher adhesion and wear-resistance PVD coating with submicro grain substrate, which increase grade wear resistance, oxidation resistance, and processing stability. • Recommended for medium and high speed processing in nickel based high-temperature alloys.
	GST7115	Yellow		<ul style="list-style-type: none"> • New nano structure PVD coating with higher hot hardness and anti-plastic deformation substrate. Special post-treatment, which make excellent high temperature wear resistance and adhesive wear resistance. • Recommended for low and medium speed finishing to semi-finishing processing in nickel based high-temperature alloys, good surface quality.
	GST7130	Yellow		<ul style="list-style-type: none"> • New PVD coating with high Co submicro grain substrate, which have good adhesion, extremely high toughness, and cutting edge strength. • Recommended for low and medium speed roughing in nickel based high-temperature alloys, good surface quality.
	GS3115	Purplish red		<ul style="list-style-type: none"> •Fine grained cemented carbide substrate, matching PVD coating with high aluminum content, have excellent adhesion and wear resistance. •Recommended for semi-finishing or finishing of stainless steels and heat resistant alloys.
	GS3125	Purplish grey		<ul style="list-style-type: none"> •TiAlN PVD coating with higher hot hardness and anti-plastic deformation substrate, which have good antioxidant performance and adhesive wear resistance. •Recommended for medium speed finishing to semi-finishing processing in high temperature alloy, titanium alloy, stainless steel.

PVD Coated Carbide

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
N /	GNT7120	Silver		<ul style="list-style-type: none"> •The newly upgraded coating has extremely high hardness and excellent adhesion, and has almost no affinity with non-ferrous metals. It is paired with a high wear-resistant hard alloy matrix to achieve efficient processing of non-ferrous metals such as aluminum alloys. • Recommend universal processing of non-ferrous metals such as copper and aluminum alloys.
	GAT7115	Gray		<ul style="list-style-type: none"> • New nanostructured PVD coating combine with micro-grain cemented carbide substrate and special surface treatment, provides outstanding wear resistance, oxidation resistance and machining stability. • Suitable for steel and stainless steel in general cutting condition with medium or high speed.
	GAT7120	Purplish red		<ul style="list-style-type: none"> • High wear-resistant PVD coating with ultra-fine grained cemented carbide substrate, provides excellent wear resistance at medium and low speed, achieving precision machining. • Suitable for steel and stainless steel in stable cutting condition with low or medium speed.
	GAT7120A	Purplish red		<ul style="list-style-type: none"> • Optimized micro-grain carbide substrate with high wear resistant PVD coating, provides high versatility, for steel cutting has excellent performance. • Suitable for general cutting of steel materials.
	GAT7125	Gray		<ul style="list-style-type: none"> • New generation coating with new PVD technology, combined with high-Co cemented carbide substrate, provides excellent toughness and cutting edge strength. • Suitable for steel and stainless steel in unstable cutting condition.
	GA4330	Yellow		<ul style="list-style-type: none"> •New TiAlN coating with fine grain substrate, which increase wear-resistance and cutting stability. •Recommended for medium hardness steel and stainless steel processing.
	GA4230	Purplish red		<ul style="list-style-type: none"> •PVD TiAlN coating with high toughness substrate provides excellent wear resistance and high edge security for a broad application area. •Recommended as general choice for parting and grooving of steels.

Carbide

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
S	GS9125	Uncoated		<ul style="list-style-type: none"> •Uncoated fine grain substrate has a good balance of wear resistance and toughness. •Recommended as the first choice for titanium alloys, and even for semi-finishing of titanium alloys grooving.
	GN9110	Uncoated		<ul style="list-style-type: none"> •Uncoated fine-grained grade has great wear resistance. •Recommended for finishing of aluminum alloys and copper alloys at high cutting speeds.
N	GN9120	Uncoated		<ul style="list-style-type: none"> •Fine-grained substrate with special surface treatment improves the wear resistance and less built-up-edge. •Recommended for finishing to semi-finishing of aluminum alloys, copper alloys and other non-ferrous materials.
	GN9130	Uncoated		<ul style="list-style-type: none"> •Uncoated fine-grained substrate grade has quite good wear resistance and toughness. •Recommended for semi-finishing of coppers and aluminum alloys.

Cermets

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
P	GP31TM	Purplish grey		<ul style="list-style-type: none"> •Thin PVD coating and cermet have excellent resistance to built-up-edge and plastic deformation, which ensures the high surface quality. •Recommended for finishing of carbon steels and low alloy steels at high cutting speeds.
	GP91TM	Uncoated		<ul style="list-style-type: none"> •Uncoated cermet has well wear resistance and toughness, even excellent high surface quality. •Recommended for finishing of carbon steels and low alloy steels when good surface quality is required.
	GP92TM	Uncoated		<ul style="list-style-type: none"> •Enhanced toughness, significantly improving anti chipping performance, enhancing tool versatility, achieving stable and long life machining, while achieving excellent machining surface quality. •Suitable for continuous precision machining of carbon steel and low alloy steel.

PCBN&PCD

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
K	BKN115P	Uncoated		<ul style="list-style-type: none"> •Uncoated grade with high hardness has excellent wear resistance. •Recommended for finishing of grey cast irons and valve seat machining.
	BKC120P	Purplish grey		<ul style="list-style-type: none"> •Outstanding PVD coating can reduce the friction between cutting edge and workpiece, which improves the wear resistance dramatically. •Recommended for finishing of nodular cast irons.
	BKN225Z BKN225S	Uncoated		<ul style="list-style-type: none"> •Excellent impact and wear resistance, it has strong universality. •Semi-finishing and finishing of grey cast iron and high hard alloy cast iron.
S	BSN115P	Uncoated		<ul style="list-style-type: none"> •Uncoated grade has a high edge toughness and chemical stability •Recommended for finishing of powder metallurgy parts.
H	BHC115P	Purplish grey		<ul style="list-style-type: none"> •New TiAlN coating provides the good resistance to notch wear, which reduces the roughness of the workpiece surface. •Recommended for finishing of quenched steels when high surface quality and close tolerances are required.
	BHC125P	Purplish grey		<ul style="list-style-type: none"> •CBN substrates with TiAlN coating have great toughness and wear resistance, which is capable of longer tool life and more stability. •Recommended for general machining of quenched steels.
	BHC135P	Purplish grey		<ul style="list-style-type: none"> •CBN substrate with high edge toughness matching TiAlN coating greatly improves wear resistance. •Recommended for interrupted processing of quenched steels.
	BHC210P	Bronze		<ul style="list-style-type: none"> •The new double-layer nanostructure AlTiSiN coating has excellent heat resistance and wear resistance, achieving stable performance and excellent surface roughness. •Suitable for precision machining conditions with high requirements for surface roughness and dimensional accuracy of quenched steel.

PCBN&PCD

ISO	Grade	Grade Color	Grade Microstructure	Grade Feature
H	BHC215Z	Bronze		<ul style="list-style-type: none"> •The new TiAlSiN coating has good chemical wear resistance and improves the service life at high linear speed. Low content fine crystalline CBN matrix, with excellent wear resistance and red hardness. •Suitable for continuous to light intermittent machining of hardened steel.
	BHC225P	Bronze		<ul style="list-style-type: none"> •The new double layered nanostructured AlTiSiN coating is coated on a specially designed CBN substrate, which has strong toughness and further improves wear resistance, achieving more stable processing and long service life. •Suitable for universal processing of various quenched steels.
	BHC225Z	Bronze		<ul style="list-style-type: none"> •The new TiAlSiN coating has good chemical wear resistance and improves the service life at high linear speed. A multi-modal grained CBN substrate, has superior toughness and greatly improved wear resistance, and can achieve more stable machining and longer tool life. •Suitable for general processing of hardened steel.
	BHN225S	Uncoated		<ul style="list-style-type: none"> •A multi-modal grained CBN substrate, has superior toughness and greatly improved wear resistance, and can achieve more stable machining and longer tool life. •Suitable for general processing of hardened steel.
N	DNN125P	Uncoated		<ul style="list-style-type: none"> •Medium grained diamond has excellent wear resistance and toughness. •Recommended for high efficient finishing of aluminums, coppers, plastics and graphite materials.

Overview of Small Part Turning Inserts

Small Part Turning Inserts (Positive)

7° Clearance Angle

Chip Breaker	Features	Application Range	Cross Section Chip Breaker
BF	<ul style="list-style-type: none"> • Special design of chip breaker promotes chip curling and facilitates chip removal • Small rake angle design, high tip strength and strong versatility. 		
BK	<ul style="list-style-type: none"> • Large groove width design, enhance chip removal and achieve stable machining. • Inclination angle design to control chip flow direction and reduce cutting resistance force. 		
MM	<ul style="list-style-type: none"> • Double front angle design, taking into account sharpness and strength, wide processing range. • Hyperboloid chip breaker design promotes stable chip rolling and breaking Chips, dramatically improve chip removal.

Cutting Speed Recommendation Table

ISO	Workpiece Material		Material Hardness	Grade	Cutting Speed Vc (m/min)
P	Carbon Steel	Low-carbon (C=0.1-0.25%)	HB125	GM3225	120-160-230
		Medium-carbon (C=0.25-0.55%)	HB150		100-150-195
		High-carbon (C=0.55-0.80%)	HB170		90-140-180
	Low-alloy Steel	Non-hardened	HB180		100-130-180
		Hardened and tempered	HB275		75-100-140
		Hardened and tempered	HB350		60-80-130
	High-alloy Steel	Annealed	HB200		80-110-140
		Hardened and tempered	HB325		70-90-115
	Steel Castings	Unalloyed	HB180		180-200-220
		Low-alloy	HB200		70-110-150
		High-alloy	HB225		60-100-120
		Manganese steel (12-14% Mn)	HB250		30-40-50
M	Stainless Steel	Austenitic	HB180	GM3225	90-120-140
		Ferritic/Martensitic	HB200		70-140-170
		Duplex stainless steel	HB230		60-90-120
K	Malleable Cast Iron	Ferritic	HB130	GM3225	110-130-170
		Pearlitic	HB230		85-100-145
	Gray Cast Iron	Low tensile strength	HB180		100-120-160
		High tensile strength	HB260		80-100-140
	Nodular Cast Iron	Ferritic	HB160		110-125-160
		Ferritic	HB250		80-100-120
N	Wrought Aluminum Alloys	Non aging	HB60	GM3225	350-500-700
		Aged	HB100		300-400-500
	Cast Aluminum Alloys	Non aging	HB75		300-450-500
		Aged	HB90		200-290-400
		Containing silicon (13-22% Si)	HB130		100-200-300
	Copper and Copper Alloys	Brass	HB90		100-220-300
		Bronze and non-leaded copper	HB100		80-180-255
S	Heat-resistant Alloys	Iron base	Annealed	HB200	35-45-60
			Aged	HB280	25-35-50
		Nickel base and cobalt base	Annealed	HB250	15-25-30
			Aged	HB350	10-15-25
			Cast	HB320	10-13-20
	Titanium Alloys	Commercial pure (99.5% Ti)	400Rm	140-150-170	
α+β alloys		1050Rm	50-60-70		
H	High Hardness Materials	Hardened steel	HRC55	GM3225	40-45-50
		Chilled cast iron	HB400		30-40-50

Small Part Inserts Selection Guide

GAT7115 has good result in machining stainless steel 303 and 304. GAT7145 has a good result in machining medium to high hardness stainless steel such as 316L. GAT7120A is better for machining ordinary steel and free-cutting steel

Carbide coating series

Back turning series	GSAB	ABS	TBP		SBT		
	GSTB	TKFB		JXB JTB		BTAT	

Series	Feature	Geometry	Recommended operating conditions
General grooving series	1.Divided into left and right hand, choose according to working conditions 2.Sharp cutting edge, effectively reducing cutting force 3.Universal for external turning, small cut depth end face turning	P	Chute design suitable for small cut depth with good chip breakage
		G	Large rake angle and long straight flute design meet the requirement for small feed and large cut depth machining condition
		S	edge inclination, long straight flute design, good chip guide effect, suitable for small parts machining for finishing and semi-finishing conditions
3D chip-breaker series	1.Compatible with left and right hand 2.Handle chip breakage with varying feed and cut depth 3.suitable for external and end face turning	AF	Small flute width, large rake angle design, suitable for very small cut depth of 0.02-0.2mm, good chip breakage performance and machined surface
		AK	Sharpe edge, edge inclination design to achieve variable cut depth with good chip guidance and removal performance, good machined surface
		BF	Special chip breaker, small rake angle design, suitable for small cut depth, good chip removal performance, high strength cutting edge for general processing
		BK	Large flute width, edge inclination design, good chip removal performance and machined surface
		MM	Dual rake angle, hyperboloid chip breaker design, suitable for a wide range of machining conditions, good chip removal performance suitable for rough machining for small parts

Small Part Inserts Selection Guide

Grooving

Product Series	Product category	GESAC	Kyocera	NTK	TaeguTec	Mitsubishi	Tungaloy	Korloy	Iscar
Shallow groove	Three-edged shallow groove	Custom GB	TGF GBA	GTMH		GTAH	JSTG	TBGF	
Deep groove	—	GKD	KGM	KGWP		GY2M	JCTE		
Grinding cut	Vertical mounted (General)	GSTC	TKF	CTP		CTAH	JXGR	SBC	SCH
	Vertical mounted (slim)	GSTS	TKFS						
Compression cut	Slotted	GTD	GDM	CDTP	TDJ	GY	JCGWS	MGMN	DGN

Series	Lead angle selection	Feature	Geometry	Recommend operating condition
GSTC	The insert without lead angle can effectively prevent the edge breaking and chip winding, better tool life; the insert with lead angle can reduce the core of the solid rod, prevent residual and deformation of the hollow tube	For conventional cutting tools, the right hand tool holder is generally used, the left hand tool is mainly used when there is a sub-axis to assist in clamping the work piece for cutting	U	Large rake angle, small nose radius, good sharpness, effectively optimize the surface quality of the work piece.
			T	Reinforced insert, large nose radius and relatively small rake angle ensure the strength of the cutting edge and improve tool life
			N	Large flat flute, no nose design, effectively improves tool life while ensuring the edge sharpness
GSTS		Mainly used when the sub-spindle assists in clamping and cutting, and small diameter of the workpiece, and the overhang depth of the main shaft is restricted, thin blade is suitable for machining in confined spaces	U	Large rake angle, small nose design, good sharpness, effectively optimize the surface quality of the work piece
GSTT		Conventional thread cutter are generally suitable for general 55° and general 60° thread	-	Sharp rake angle design, suitable for small parts thread machining.
